DANGEROUS GOODS CONTAINERS

**BDDG
CONTAINERS**

Our BDDG containers provide a reliable, purpose-built solution for the safe storage of dangerous goods. Designed to meet the stringent requirements for Class 3 flammable and combustible liquids and Class 8 corrosive substances, they also support the storage of hazardous materials classified under Classes 2, 4, 5, 6, and 9. Fully compliant with AS1940 and AS3780 standards, each container is engineered for durability and performance in demanding environments. BDDG containers are built to meet your storage needs, offering a practical and dependable solution for hazardous goods management.

20FT BDDG External view

◆ KEY FEATURES

- Bunded steel grated flooring efficiently manages accidental spills, safeguarding your workspace.
- Multiple air vents to meet the requirements of AS1940 and AS3780.
- High-visibility emergency guide markers on floor grating and fluorescent tape surrounding emergency exits create a safe and secure environment.
- Forklift-accessible pocket design ensures hassle-free movement and relocation.
- Built to endure extreme temperatures without compromising strength or watertightness.
- Fully compliant with ISO standards, CSC regulations, and AS1940-2014 and AS3780-2023 requirements for superior safety and certification.

◆ RANGE

Available in 10FT and 20FT, our BDDG containers deliver tough, compliant storage for dangerous goods. Choose your size, secure your site, and stay confidently compliant.
